FOUNDER PROFILE / 2026

Samarth Kandekar

Founder & CEO, VelCura Health · Nagpur, India

Applied AI · Healthcare technology · Venture building

THE QUESTION THAT STARTED IT

VelCura began with a family observation. Samarth saw his mother visit clinics for minor illnesses, with visits costing around ₹500–₹700; some of the illnesses passed within a couple of days. It prompted a question about how people can find clearer, appropriate guidance when they are unsure where to begin. He started exploring the problem in October 2025. The product idea is to make care journeys easier to navigate while keeping clinical decisions with qualified professionals.

WHAT WE ARE EXPLORING

VELCURA HEALTH	ADFLOW OS
An early-stage healthcare technology venture exploring a patient platform and clinic intelligence workflows. AI-assisted information organization is intended for clinician review.	An AI-assisted campaign operations product exploring how teams can move from a brief toward organized creative and campaign workflows.
PRODUCT CONCEPTS IN DEVELOPMENT	PRODUCT DEVELOPMENT

VelCura has no paying customers or live clinical deployments to date. Both product directions remain in early development. AI concepts are framed around safety checks and clinician review; they do not represent autonomous diagnosis or prescribing.

FOUNDER APPROACH

Build around real problems. Keep technology useful and understandable. Pair long-term ambition with validation, and design healthcare workflows around practitioner oversight.

LEARNING & COMMUNITY

Stanford Online AI in Healthcare specialization · Aspire Institute Cohort 4 Fellow
